A Zero-Waste, Women-Led Circular Economy Brewing from Discarded Seeds

Who are we?

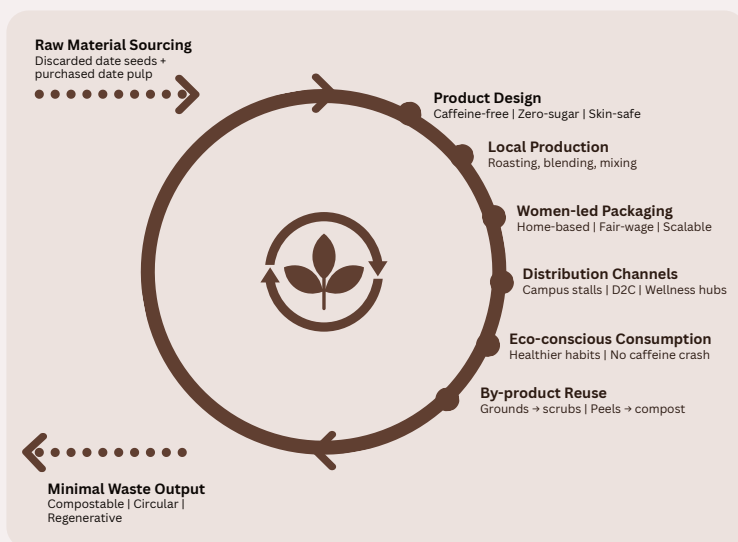

Project Khajoor is a women-led **circular** enterprise that collects **agri-waste** like discarded **date seeds** and pulp, processes them into value-added products like **caffeine-free coffee**, natural scrubs, and diabetic-safe cakes,

We **reinvest** the return into farmer incomes and home-based women-run packaging units, creating a closed-loop, zero-waste, community-first model.

Established - Oct 2024

Our Circular Economy

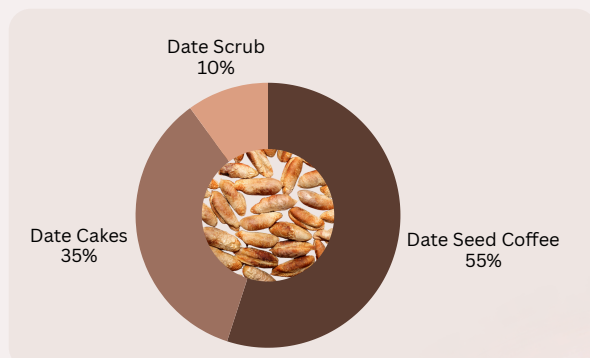

Zero-Waste Ideology

Nothing is discarded, everything repurposed

- **Date seeds** → caffeine-free coffee
- **Grounds** → natural exfoliating scrubs
- **Pulp** → diabetic-safe cakes

Glimpse of happy customers

I tried Khajoor Coffee and it's amazing! The natural sweetness is just right, and it's so light yet satisfying. This one's definitely my new daily favorite!

I recently tried the khajoor coffee and cakes and believe me I was amazed. The coffee was so soothing without leaving me with a false sense of energy, will definitely suggest my friends as well. ✨
